TABLE OF CONTENTS

Education Organization Category

The Education Organization Category provides information about the state education agency, education service centers, local education agencies (school districts and charter schools), and campuses. This data category supports the definition of the education offerings provided by campuses, specifically the courses taught, the sections in each course offered and the class period and location of those sections, and the alternative/supplemental programs offered.

The shared services arrangement (SSA) participation data is also reported for each organization type when applicable.

This category includes:

- Complex type data layouts, which show the relationship of data submissions to the Education Organization Category. Also described is the information on the data submission for the current school year for LEAs submission of data to the ESCs and ESCs submission of data to TEA;

  Asterisks (**) that appear in the complex type data layouts indicate that there is a complex type within a complex type. The Element Ids that are indented identify the data elements that are part of the complex type denoted with asterisks (**).

  Data rows that are in gray and italicized represent complex types and data elements that are part of the Ed-Fi Core Schema, but not for Texas use at this time.

- Category type discussions which describe information related to each particular record type;

- Data submission samples, which provide samples of how to submit the data for each category.

Description

The SSAOrgAssociationExtension Complex Type identifies the ESC/LEA fiscal agents and the ESC and/or LEA member(s) for each type of shared services arrangement (SSA) that exists among two or more ESCs and or LEAs.

The SSA data is used by TEA to match SSA participants and fiscal agents for financial reporting purposes. This data figures into the "maintenance of effort" (MOE) for special education spending thresholds for both state and federal allotments. The Texas Education Agency also uses the SSA information reported through this complex to check for consistent SSA financial reporting between Fiscal Agents and Member Districts.

Reporting Requirements

Submission 1

The SSAOrgAssociationExtension Complex Type must be reported by each ESC and LEA which participates in or are a member of a SSA. This includes the ESCs and LEAs serving as fiscal agents for a particular SSA.

Submission 2

For each record in the SSAOrgAssociationExtension Complex Type, there must be an ActualExtension Complex Type data record and a SharedServiceArrangementExtension Complex Type data record with appropriate fund codes for the SSA financial reporting.

Business Rules

**TX-FiscalAgentEducationOrganizationReference

The TX-FiscalAgentEducationOrganization Complex Type represents the provider of the shared service (i.e., the fiscal agent).

**EducationalOrgIdentity Complex Type

The EducationalOrgIdentity Complex Type provides user information to lookup and link to an existing educational organization record in the receiving system.

FISCAL-AGENT-DISTRICT-ID (E0777) is the county-district number of the shared services arrangement fiscal agent registered with the Texas Education Agency.

For a fiscal agent, the DISTRICT-ID and FISCAL-AGENT-DISTRICT-ID will be the same.

When the fiscal agent reports its own SSAOrgAssociationExtension Complex Type, the fiscal agent reports a record for each shared services arrangement regardless of whether it participates as a member.

FISCAL-AGENT-DISTRICT-ID is the fiscal agent district ID number. The fiscal agent district is responsible for reporting:

- the actual financial data for the prior school year for the shared services arrangement, and

- personnel, payroll, and responsibility information for all administrative and

- all itinerant employees who are paid by the fiscal agent, whether or not these employees are shared by the member districts.

**LEAReference Complex Type

**EducationalOrgIdentity Complex Type

The EducationalOrgIdentity Complex Type provides user information to lookup and link to an existing educational organization record in the receiving system.

DISTRICT-ID (E0212) indicates the district identification number registered with the Texas Education Agency. For the purposes of the SSAOrgAssociationExtension Complex Type, the DISTRICT-ID data element identifies the member ESC/LEA that is a member of a particular SSA type identified with the Shared Services Arrangement Type Codes (E0776).

DISTRICT-ID is the member district ID number.

DISTRICT-ID on the SSAOrgAssociationExtension Complex Type must match the value for DISTRICT-ID on the LocalEducationAgencyExtension Complex Type.

SHARED-SVCS-ARRANGEMT-TYPE-CODE (E0776) indicates the type of program or service provided by the shared service arrangement.

Special Reporting Requirements

Charter schools do not submit any data through the Shared Services Arrangement Organization Association Complex Type. A charter school cannot be reported as either a SSA member or a SSA fiscal agent.

Texas School for the Blind and Visually Impaired and Texas School for the Deaf do not submit data through the Shared Services Arrangement Organization Association Complex Type.

FASRG Model #1 Example

(Resource Guide Models - FASRG Model #1)

A shared services arrangement is formed for an ESEA, Title I, Part A – Improving Basic Programs project. The funds are received from TEA. The combined entitlements for the two participating members are $100,000. One member district (Member #1) that acts as fiscal agent will pay $20,000 for a remedial reading teacher at campus 101. The other member district (Member #2) will pay $25,000 for a remedial reading teacher at campus 041. The fiscal agent will retain $25,000 to employ a remedial math teacher that will work 50% of the time at both schools, at the same campus as the reading programs. The remaining $30,000 will be retained by the fiscal agent to employ a program director to serve both school districts. This information is reported in the following way.

Explanation

- DISTRICT-ID is 444444 for Member #1 ISD.
- DISTRICT-ID is 333333 for Member #2 ISD.
- SHARED-SVCS-ARRANGEMT-TYPE-CODE 04 indicates compensatory or remedial education shared services arrangement.
- FISCAL-AGENT-ID is 444444 for Member #1 ISD serving as Fiscal Agent.

FASRG Model #2 Example

(Resource Guide Models - FASRG Model #2)

The education service center acts as fiscal agent for an ESEA, Title I, Part C – Education of Migratory Children project funded through TEA. All services are provided by the fiscal agent and no funds are passed through to the three member districts. The combined entitlement is $75,000. The education service center provides each school district a teacher who has a salary of $25,000 per year for the 5th grade. These teachers provide services which result in the extension of the school day to 5:00 p.m. While the curriculum is basic, the extended day assists the students in completing courses in a shorter school year. This information is reported in the following way.

- DISTRICT-ID is 444444 for Member #1 ISD.
- SHARED-SVCS-ARRANGEMT-TYPE-CODE 07 indicates migrant education shared services arrangement.
- FISCAL-AGENT-ID is 777950 for Education Service Center serving as Fiscal Agent.
- DISTRICT-ID is 333333 for Member #2 ISD.
- DISTRICT-ID is 222222 for Member #3 ISD.
- DISTRICT-ID is 777950 for Education Service Center.

FASRG Model #3 Example

(Resource Guide Models - FASRG Model #3)

Member district #1 acts as fiscal agent for a state/locally funded special education shared services arrangement that includes 1 other school district. Expenditures are allocated according to the example in the Financial Accountability System Resource Guide, section 1.3.3. Member school districts receive revenue from various sources (foundation fund revenue, tax revenue, etc.). These revenues are recorded in the General Fund and are to be used as the district deems appropriate with written established guidelines for operating purposes. The monies paid to the fiscal agent may not be identifiable as being from a specific revenue source. Periodically during the year, member school districts pay monies to the fiscal agent. Member school districts determine the payment amount based on predetermined criteria established in the shared services arrangement agreement. This information is reported in the following way.

Description

The SchoolExtension complex type represents an educational organization that includes staff and students who participate in classes and educational activity groups.

Reporting Requirements

For Dashboard reporting, an LEA must report at least one active instructional campus that is registered through AskTED with the Texas Education Agency.

For PEIMS reporting, every LEA must report one campus record for each active instructional campus that is registered through AskTED with the Texas Education Agency.

A LEA cannot report the CAMPUS-ID of another LEA in the SchoolExtension Complex Type.

Texas Education Agency will pre-populate the Education Data Warehouse (EDW) with the AskTED education organization data that is centrally managed by the Texas Education Agency. However, an LEA may populate the education organization data from the source system but data will be overridden with information from AskTED.

Description

The SectionExtension Complex Type represents a setting in which organized instruction of course content is provided to one or more students for a given period of time. This complex type lists the current year courses taken by a student or taught by a teacher. A course may be offered to more than one class/section. Instruction, provided by one or more teachers or other staff members, may be delivered in person or via a different medium.

Reporting Requirements

The SectionExtension Complex Type inherits data elements from the Section Complex Type.

Information from the SectionExtension Complex Type is used to capture the complete course offerings for a particular campus. This information is then used for translating the data submitted for staff and student course participation in order to identify the classes enrolled in by students and classes taught by teachers.

All of the reference data elements must be defined either by the Course Complex Type in the Education Organization Interchange, Session Complex Type in the Education Org Calendar Interchange, and the CourseOffering Complex Type in the Master Schedule Interchange.

One record must be submitted in collection 3 for each unique class (course section) that was offered during the school year. Report all courses offered through a campus regardless of the method of delivery. If a student is being instructed in a particular Service on or through a campus, then the information for that SERVICE-ID should be included on this record.

For students that are placed in or are expelled to a DAEP program, or expelled to a JJAEP, the campus that enrolls the student during these disciplinary removals is responsible for creating the Section Complex Type data that reflect the new course sections to which the student has been assigned while attending a DAEP or a JJAEP.

Business Rules

Section Complex Type

CLASS-ID-NUMBER (E1056) is a number identifying a unique course section, that is unique for a particular school year, Campus, and SERVICE-ID.

CLASS-ID-NUMBER identifies a unique course section. CLASS-ID-NUMBER must be unique by school year, CAMPUS-ID, and SERVICE-ID. CLASS_ID_NUMBER must be unique such that multiple teachers can be linked to a single course section through the Teacher Assignment Records and students enrolled in a unique course section can be identified by the CLASS_ID_NUMBER on the Course Completion Record.

SEQUENCE-OF-COURSE (E1363) represents a section that is part of a sequence of parts for a course, the number if the sequence. If the course has only one part, the value of this section attribute should be 1.

EDUCATIONAL-ENVIRONMENT (E1160) is the setting in which a child receives education and related services; for example: Center-based instruction, Home-based instruction, Hospital class, Mainstream, Residential care and treatment facility.

MEDIUM-OF-INSTRUCTION (E1364) is the media through which teachers provide instruction to students and students and teachers communicate about instructional matters; for example: Technology-based instruction in classroom, Correspondence instruction, Face-to-face instruction, Virtual/On-line Distance learning, Center-based instruction.

POPULATION-SERVED (E1362) is the population for which the course was designed. For example: Bilingual students, Remedial education students, Gifted and talented students, Career and Technical Education students, Special education students.

**AvailableCredit Complex Type

The AvailableCredit Complex Type represents the amount of credit available to a student who successfully meets the objectives of the course. Available credits are measured in Carnegie units. A course meeting every day for one period of the school day over the span of a school year offers one Carnegie unit. See publication: U.S. Department of Education, NCES, 2007-341, Secondary School Course Classification System: School Codes for the Exchange of Data (SCED).

CREDIT (E1112) is the value of credits or units of value awarded for the completion of a course

**CourseOfferingReference Complex Type

The CourseOfferingReference Complex Type references the entity that represents an offering of a course by school during a session, representing the course catalog of available courses.

ref is an XML generated XML IDREF that references the object associated with this object.

For the SectionExtension Complex Type record, do not include courses with SERVICE-IDs that begin with SA, SE, SR, SS, 01, 8, or 9. Additionally the SERVICE-IDs for Prekindergarten and Kindergarten that begin with "02" cannot be reported. This rule is enforced by a fatal edit.

SERVICE-ID 02000000, Elementary, Grades 1-6, should be used only when a teacher is serving multi-grade or ungraded student populations, typically in a pullout program. It is not used for those situations where a district assigns a teacher two contiguous grades of students because neither grade has enough students to allow for a single classroom.

For elementary school courses, districts have the option of using either the generic elementary SERVICE-IDs (02010000 - Grade 1, 02020000 - Grade 2, 02030000 - Grade 3, 02040000 - Grade 4, 02050000 - Grade 5, 02060000 - Grade 6) for the core curriculum or the subject specific Service IDs in the student and teacher scheduling system(s). However, the district should make the decision to report these elementary Service IDs based upon how the students will be reported on the CourseTranscriptExtension Complex Type in the summer submission. A school will not be able to report teachers using one method and students with the other as the data will not pass the fatal edits in the summer submission for the Classroom Link data reporting.

**CourseOfferingIdentity Complex Type

The CourseOfferingIdentity Complex Type provides user information to lookup and link to an existing course offering record in the receiving system.

LOCAL-COURSE-CODE (E1194) is the local code assigned by the School that identifies the course offering provided for the instruction of students.

COURSE-OFFERING-TERM (E1503) is the term for the session during the school year.

COURSE-OFFERING-SCHOOL-YEAR (E1498) is the identifier for the school year.

CAMPUS-ID (E0266) indicates the unique campus identification number registered with the Texas Education Agency. It is the linking of DISTRICT-ID with the campus identification number that is associated with the course offering.

**SchoolReference Complex Type

The SchoolReference Complex Type represents the school where the section is taught.

**EducationalOrgIdentity Complex Type

The EducationalOrgIdentity Complex Type provides user information to lookup and link to an existing educational organization record in the receiving system.

CAMPUS-ID (E0266) indicates the unique campus identification number registered with the Texas Education Agency. It is the linking of DISTRICT-ID with the campus identification number that is associated with the course offering.

**LocationReference Complex Type

The LocationReference Complex Type references the location, typically a classroom, where the section meets.

If a location is not available per Section, create a default location record.

**LocationIdentity Complex Type

The LocationIdentity Complex Type provides user information to lookup and link to an existing location record in the receiving system.

CLASSROOM-IDENTIFICATION-CODE (E1292) is a unique number or alphanumeric code assigned to a room by a school, school system, state, or other agency or entity.

CAMPUS-ID (E0266) indicates the unique campus identification number registered with the Texas Education Agency. It is the linking of DISTRICT-ID with the campus identification number associated with the location, typically a classroom, where the section meets.

**ClassPeriodReference Complex Type

The ClassPeriodReference Complex Type represents the class period during which the section meets.

**ClassPeriodIdentity Complex Type

The ClassPeriodIdentity Complex Type provides user information to lookup and link to an existing class period record in the receiving system.

CLASS-PERIOD (E1074) is the class period identifier that illustrates the time of the school day that a particular class was offered.

CAMPUS-ID (E0266) indicates the unique campus identification number registered with the Texas Education Agency. It is the linking of DISTRICT-ID with the campus identification number that is associated with the course offering.

SectionExtension Complex Type

SCHOOL-YEAR (E1093) is the identifier for the school year.

SCHOOL-YEAR is the calendar year that identifies the spring semester for a particular school year.

POPULATION-SERVED-CODE (E0747) identifies the student population for which a service has been designed or is intended. It does not necessarily identify the program eligibility of the students who receive the service.

POPULATION-SERVED-CODE does not necessarily identify the program eligibility of the students who receive the service. A scheduled classroom service will have a single POPULATION-SERVED-CODE value (e.g. "01" for regular students) despite the fact that members of other student populations happen to be served in the class. The same holds true for non-classroom services. It is only when the service has been tailored for a special population that POPULATION-SERVED-CODE should be given values that apply to special student populations.

The correct value of POPULATION-SERVED-CODE is determined by the population for which the service was designed, not by the student population that receives a service. If two or more populations are being served, only one record should be reported, using the population for which the service was designed.

COURSE-SEQUENCE-CODE (E0948) identifies the unique part(s) of a course when a course is taught during a single grading period or semester or across multiple grading periods or semesters.

The COURSE-SEQUENCE-CODE identifies how the course was taught to the student during the school year, or in the summer.

NON-CAMPUS-BASED-INSTRUCTION-CODE (E1072) indicates that a course was offered for class credit or student achievement, but 1) was not taught by a school district/charter school employee or a contracted teacher , or 2) was taught by a school district/charter school employee or a contracted teacher at a facility other than the campus where the student is enrolled. Examples include but are not limited to college based instruction, non-district teacher, non-campus teacher, internet based instruction, electronic Course Pilot (eCP), and Texas Virtual School Network (TxVSN).

Description

The Course Complex Type represents the organization of subject matter and related learning experiences provided for the instruction of students on a regular or systematic basis. This is the course catalog of all courses offered at each school.

Reporting Requirements

For Dashboard reporting, include all courses that have ever been offered in the LEA, not just those that are for the current year. These prior year courses will be referenced in the student transcripts.

All course records in the Course Complex Type must be reported with an 'Identification System Attribute' of 'LEA course code'.

For PEIMS reporting, all course records in the Course Complex Type must be reported with an 'Identification System Attribute' of 'State course code'.

Business Rules

LOCAL-COURSE-TITLE (E1182) is the local descriptive name given to a course of study offered in a school or other institution or organization. In departmentalized classes at the elementary, secondary, and postsecondary levels (and for staff development activities), this refers to the name by which a course is identified (e.g., American History, English III). For elementary and other non-departmentalized classes, it refers to any portion of the instruction for which a grade or report is assigned (e.g., reading, composition, spelling, and language arts).

NUMBER-OF-PARTS (E1183) is the number of parts identified for a course.
