</thead>
<tbody>
<tr>
<td>Unique ID v10.3.0 Released with Enrollment Functionality Enabled</td>
<td>March 5, 2018</td>
</tr>
</tbody>
</table>
TSDS UNIQUE ID BATCH FILE FORMAT

Detailed below are the specifications of the TSDS Unique ID Batch File Format. This file format must be followed when submitting students/staff for id assignment or enrollment event data (input file). The Batch File should contain three different categories of information and conform to the file naming conventions. The three categories of records are:

- Header Record
- Detail Record
- Trailer Record

The Header and Trailer record should be delimited by a single tab or space character. The Trailer shall have no empty spaces or data after the last Trailer column.

The same file format will be followed when the TSDS Unique ID system generates a file with the TSDS Unique Id number assignment (output file).

Filename

For each Batch file submitted, the system must identify the correct organization and data collection in order to process the file correctly:

Student:

<table>
<thead>
<tr>
<th>Position</th>
<th>1-6</th>
<th>7</th>
<th>8-10</th>
<th>11</th>
<th>12-18</th>
<th>19</th>
<th>20-31</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>District Code</td>
<td>_</td>
<td>Campus ID</td>
<td>_</td>
<td>Collection Code</td>
<td>_</td>
<td>Timestamp</td>
</tr>
</tbody>
</table>

Staff:

<table>
<thead>
<tr>
<th>Position</th>
<th>1-6</th>
<th>7</th>
<th>8-10</th>
<th>11</th>
<th>12-16</th>
<th>17</th>
<th>18-29</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>District Code</td>
<td>_</td>
<td>Campus ID</td>
<td>_</td>
<td>Collection Code</td>
<td>_</td>
<td>Timestamp</td>
</tr>
</tbody>
</table>

Enrollment Event:

<table>
<thead>
<tr>
<th>Position</th>
<th>1-6</th>
<th>7</th>
<th>8-10</th>
<th>11</th>
<th>12-18</th>
<th>19</th>
<th>20-31</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>District Code</td>
<td>_</td>
<td>Campus ID</td>
<td>_</td>
<td>Collection Code</td>
<td>_</td>
<td>Timestamp</td>
</tr>
</tbody>
</table>

**District Code:** The LEA code for which the data is being uploaded. (6 digits in length)

**Campus ID:** The campus ID for which the data is being loaded. If loading data for the LEA, use "000" for campus ID. (3 digits in length).

**Collection Code:** The collection code is a character string that uniquely identifies the data collection. (5-8 characters in length).
The Collection Code shall indicate the type of data being submitted. The values are:

“STUDENT” which represents the Student data.

“STAFF” which represents the Staff data.

“ETEVENT” which represents the Enrollment Event data

**Timestamp:** The timestamp is a date in YYYYMMDDHHMM format (e.g. 201406021015). The Timestamp shall be a system generated value at the time the data is extracted. (12 digits in length)

There must be an underscore (_) between each element in the file name.

**Examples:**

227901_002_STUDENT_201201241015 = Student Data for Austin High School in Austin ISD.

227901_000_STAFF_201201241159 = Staff Data for Austin ISD.

227901_000_ETEVENT_201803051225 = Enrollment Event Data for Austin ISD

**Submitting ETEVENT Records**

2017-2018 Enrollment Event Submission Guidelines (March 05 – July 31, 2018)

Only submit new or updated enrollment and withdrawal events each week.

Enrollment Event files should be submitted each week an LEA is in session based on the local instructional calendar where there is any enrollment or withdrawal activity within the LEA. Timely and accurate enrollment data aids all LEAs in locating students for data reporting and student record request. Enrollment event files are not required in weeks that a district is not in session for at least one day or during the weeks that PEIMS submissions are due at TEA.

Exception: Once a district has completed its final summer submission and its TSDS PEIMS data has reached a status of “LEA DATA ACCEPTED-ESC,” one additional Enrollment event submission is required.
Header Record Layout

The header record should always be the first record. Each of the fields should be delimited in the header by the field name reference below. The header record contains the following fields:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Delimiter</th>
<th>Required</th>
<th>Data Type</th>
<th>Format Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Record Type</td>
<td></td>
<td>Yes</td>
<td>VarChar (2)</td>
<td>The Record Type Value must equal &quot;TH&quot;.</td>
</tr>
<tr>
<td>Extract Date</td>
<td></td>
<td>Yes</td>
<td>VarChar (10)</td>
<td>The Extract Date must be in one of the following formats:</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>• mm/dd/yyyy</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>• m/d/yyyy</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>• mm/d/yyyy</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>• m/dd/yyyy</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>• yyyy-mm-dd</td>
</tr>
<tr>
<td>Extract Time</td>
<td></td>
<td>Yes</td>
<td>VarChar (8)</td>
<td>The Extract Time must be in the following format:</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>• hh:mm:ss</td>
</tr>
<tr>
<td>Transmission ID</td>
<td></td>
<td>Yes</td>
<td>VarChar (10)</td>
<td>The Transmission ID is a number utilized by the submitter for auditing as an identifier for the submitter.</td>
</tr>
<tr>
<td>Version</td>
<td></td>
<td>Yes</td>
<td>VarChar (10)</td>
<td>The Version Value must equal &quot;3.0&quot;.</td>
</tr>
<tr>
<td>Delimiter</td>
<td>delimiter=0X2C</td>
<td>Yes</td>
<td>VarChar (4)</td>
<td>The Delimiter must be a comma delimiter, the character literal would be &quot;delimiter=,&quot; and the hex representation would be &quot;delimiter=0X2C&quot;.</td>
</tr>
<tr>
<td>Source Name</td>
<td>source=</td>
<td>Yes</td>
<td>VarChar (10)</td>
<td>The Source Name value must equal &quot;SIS&quot; or &quot;HR&quot;.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>If a source is not provided in the header, the file will be rejected.</td>
</tr>
<tr>
<td>Text Qualifier</td>
<td>qualifier=0X22</td>
<td>Yes</td>
<td>VarChar (10)</td>
<td>The Text Qualifier must be the text or the hex representation of the text qualifier that is used in the detail records (double quote only qualifier=0X22)</td>
</tr>
</tbody>
</table>
Detail Record Layout

The detail records appear between the header and trailer records. Each of the fields should be delimited even if data is not available for certain fields. These records should represent the individual student/staff/enrollment event data and should contain the following fields:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Required</th>
<th>System - Data type</th>
<th>Used for Matching</th>
<th>Notes/Format Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Record Type</td>
<td>Yes</td>
<td>VarChar(2)</td>
<td>n/a</td>
<td>The Record Type Value must equal 'ID'.</td>
</tr>
<tr>
<td>Current School Code</td>
<td>Yes</td>
<td>VarChar(9)</td>
<td>No</td>
<td>School Code where the student is currently enrolled or where the staff is currently employed. Indicates the unique campus number registered with the Texas Education Directory (askTED). <strong>Note:</strong> For non-campus staff, submit 000 as the last three digits of the Current School Code (for example, 227901000).</td>
</tr>
<tr>
<td>Reserved Field</td>
<td>No</td>
<td>VarChar(20)</td>
<td>No</td>
<td>Not used by TEA. Leave this field blank</td>
</tr>
<tr>
<td>Last Name</td>
<td>Yes</td>
<td>VarChar(25)</td>
<td>Yes</td>
<td>Legal last name of the student or staff.</td>
</tr>
<tr>
<td>First Name</td>
<td>Yes</td>
<td>VarChar(17)</td>
<td>Yes</td>
<td>Legal first name of the student or staff.</td>
</tr>
<tr>
<td>Middle Name</td>
<td>No</td>
<td>VarChar(14)</td>
<td>Yes</td>
<td>Legal middle name of the student or staff.</td>
</tr>
<tr>
<td>Name Suffix</td>
<td>No</td>
<td>VarChar(1)</td>
<td>No</td>
<td>Valid Values: 1 (Jr), 2 (Sr), 3 (II), 4 (III), 5 (IV), 6 (V), 7 (VI), 8 (VII), 9 (VIII), A (I), B (IX), C (X).</td>
</tr>
<tr>
<td>Gender</td>
<td>Yes</td>
<td>VarChar(1)</td>
<td>Yes</td>
<td>Valid Values: F (Female) or M (Male).</td>
</tr>
<tr>
<td>Date of Birth</td>
<td>Yes</td>
<td>VarChar(10)</td>
<td>Yes</td>
<td>Valid Formats: mm/dd/yyyy, m/d/yyyy, mm/dd/yyyy, yyyy-mm-dd</td>
</tr>
<tr>
<td>Current Grade Level Code</td>
<td>Yes</td>
<td>VarChar(2)</td>
<td>No</td>
<td>Valid Values: EE (Early Education), PK (Pre-Kindergarten), KG (Kindergarten), 01 (Grade 1), 02 (Grade 2), 03 (Grade 3), 04 (Grade 4), 05 (Grade 5), 06 (Grade 6), 07 (Grade 7), 08 (Grade 8 ), 09 (Grade 9), 10 (Grade 10), 11 (Grade 11), 12 (Grade 12), and 00 (only valid for Staff).</td>
</tr>
<tr>
<td>Local Student ID</td>
<td>Yes</td>
<td>VarChar(9)</td>
<td>No</td>
<td>ID used in the local Student Information System to uniquely identify the student in the submitting system. The primary purpose of this field is to provide a mechanism to import student data from the TSDS Unique ID system back into the local source systems. For staff, ID used in the local Human Resource System.</td>
</tr>
<tr>
<td>Social Security Number or S-#</td>
<td>Yes</td>
<td>VarChar(9)</td>
<td>Yes</td>
<td>Student or Staff Social Security Number. Or, state-approved alternate identification for student</td>
</tr>
<tr>
<td>Race</td>
<td>Yes</td>
<td>VarChar(1)</td>
<td>No</td>
<td>Valid Values: I (American Indian Alaska Native), A (Asian), B (Black African American), P (Native Hawaiian Pacific Islander), W (White).</td>
</tr>
<tr>
<td>TSDS Uniq-ID</td>
<td>Yes/No</td>
<td>VarChar(10)</td>
<td>No</td>
<td>This field is the assigned unique id and is provided in the output file. This value will be ten significant digits and will not begin with 0. This field is mandatory for every Enrollment Event record submitted.</td>
</tr>
<tr>
<td>Field Name</td>
<td>Required</td>
<td>System - Data type</td>
<td>Used for Matching</td>
<td>Notes/Format Details</td>
</tr>
<tr>
<td>------------------------</td>
<td>----------</td>
<td>--------------------</td>
<td>-------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Current District Code</td>
<td>Yes</td>
<td>VarChar(6)</td>
<td>No</td>
<td>District code where the student is currently enrolled or where staff is currently employed. Indicates the district identification number registered with the Texas Education Agency.</td>
</tr>
<tr>
<td>Current School Year</td>
<td>Yes</td>
<td>VarChar(4)</td>
<td>No</td>
<td>Valid Format: YYYY. Represents the latest year in the school year range. (“2013” for the 2012-2013 school year).</td>
</tr>
<tr>
<td>Alternate Last Name</td>
<td>No</td>
<td>VarChar(25)</td>
<td>No</td>
<td>Maiden Name of Student or Staff.</td>
</tr>
<tr>
<td>Reserved Field</td>
<td>No</td>
<td>VarChar(50)</td>
<td>No</td>
<td>Not used by TEA. Leave this field blank.</td>
</tr>
<tr>
<td>Reserved Field</td>
<td>No</td>
<td>VarChar(60)</td>
<td>No</td>
<td>Not used by TEA. Leave this field blank.</td>
</tr>

<th>Data Type</th>
<th>Format Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Record Comments</td>
<td>No</td>
<td>Varchar (2048)</td>
<td>This field contains a list of validation errors that the application encountered for this input record during the validation process. If more than one error was found in a record, all errors are listed with each one delimited from the other by a semicolon.</td>
</tr>
</tbody>
</table>

NOTE: One batch file should not contain more than 40,000 detail records.

**Trailer Record Layout**

The trailer record should always be the last record in the file and should contain the following fields:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Required</th>
<th>Data Type</th>
<th>Format Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Record Type</td>
<td>Yes</td>
<td>Varchar (2)</td>
<td>The Record Type Value must equal &quot;TT&quot;.</td>
</tr>
<tr>
<td>Transmission ID</td>
<td>Yes</td>
<td>Varchar (10)</td>
<td>The Transmission ID is a number utilized by the submitter for auditing as an identifier for the submitter. This ID must match the Transmission ID in the header record.</td>
</tr>
<tr>
<td>Number of Records</td>
<td>Yes</td>
<td>Varchar (10)</td>
<td>Number of records in the file, including the &quot;TH&quot; and &quot;TT&quot; records. The value should be left aligned and not have any trailing spaces.</td>
</tr>
</tbody>
</table>

There should be no extra spaces or data after the last column in the Trailer Record.
Example for Race Codes:

Five Race fields are available in the application, but the same value cannot currently be supplied in any of the five fields. For example, if “A” is supplied in the Race field, “A” cannot be supplied in the Race 2, Race 3, Race 4, or Race 5 fields. Additionally, data must be supplied in consecutive order and a race column cannot be skipped. For example, a race code cannot be supplied in the Race 4 field if there is not a value in the Race, Race 2, or Race 3 fields.

Valid Values: I (American Indian Alaska Native), A (Asian), B (Black African American), P (Native Hawaiian Pacific Islander), W (White).

<table>
<thead>
<tr>
<th>Example</th>
<th>Race</th>
<th>Race 2</th>
<th>Race 3</th>
<th>Race 4</th>
<th>Race 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black</td>
<td>B</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Black, Asian</td>
<td>B</td>
<td>A</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Black, Asian, White</td>
<td>B</td>
<td>A</td>
<td>W</td>
<td></td>
<td></td>
</tr>
<tr>
<td>White, Asian</td>
<td>W</td>
<td>A</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>White, Black</td>
<td>W</td>
<td>B</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>White, Black, Asian, American Indian, Pacific Islander</td>
<td>W</td>
<td>B</td>
<td>A</td>
<td>I</td>
<td>P</td>
</tr>
</tbody>
</table>

TT Cumfile4 3
TSDS UNIQUE ID WEB SERVICES TECHNICAL GUIDE

About This Technical Guide

This technical guide serves as a reference guide for the TSDS Unique ID Web Services for Students and Staff. A Web Service is designed to allow different applications from different sources to communicate with TSDS Unique ID using an XML-based process. These Web Services allow TSDS Unique ID system functionality to be exposed for assigning or retrieving identifiers, requesting a list of near matches, submitting near match decisions, and searching by student/staff or batch.

This document explains in detail the information necessary to utilize the TSDS Unique ID Web Services (Web Services). In this document, you will learn:

- How the TSDS Unique ID Web Services work.
- How to interpret the response information sent back by the TSDS Unique ID Web Service.

Submissions of students and staff through the Web Service are logged as a separate batch type, thus allowing for filtering within the TSDS Unique ID system interface later.

This technical guide includes some notes that are designed to highlight important information.

The following Notes indicators are used:

Note: This box mentions things that require special attention. The symbol to the left indicates an important note to remember.

About Web Services

TSDS Unique ID includes four Web Services, including ID Assignment, Near Match List, Near Match Resolution, Search by Batch, and Search By Student/Staff. The first three Web Services existed in prior releases and will function as they did previously. The system includes two file formats for Version 7.x and above. To accommodate the new template, new Web Services have been created for ID Assignment, Near Match Resolution, and Near Match List. These new Web Services are identified with V2 in the service names and object names. For example, the new ID Assignment Web Service is IDAssignmentV2 and the Student object is StudentV2. The existing Web Services have not changed.

The new RESTful Web Services in v10.0 are available for version 3 only. All Service Names and Object Names for RESTful Web Services are identified with V3. For example, the ID Assignment Web Service is IDAssignmentV3 and instead of the Student object, a more generic person object PersonV3 is used.
IDAssignmentV2- Assigning/Retrieving an Identifier

The IDAssignmentV2 Web Services will complete the identifier assignment process and assign an identifier, return a list of near matches, update history information for matching records, and will allow a state identifier to be returned. Upon submission of a request, the Web Service will return an ID Assignment Result element. It will be named IDAssignmentResultV2 depending on the service being called. This contains the status property that identifies success values for the request.

If the submission record does not have a matching record in TSDS Unique ID system, the ID Assignment Result element will return a no match status and will assign an ID. The newly assigned ID will be returned in the StateStudentId element.

Example:

```xml
<stateStudentId xsi:type="xsd:string">5202763107</stateStudentId>
```

If a matching record is found in the system, the history information for the record will be updated if needed as appropriate and will return a status message indicating the history update. If a matching record is found in the system, but the no updates were needed, a status will be returned indicating no update was needed. If the submission record cannot be uniquely identified by the system, the Web Service will return the potential match records for the submission. For more details, please refer to the IDAssignmentResultV2 Status table below and the SOAP Examples in Appendix A.

Web service accounts for LEAs are managed in the TEAL secure environment. These service account credentials are passed in the web service call as parameters.

Process Flow Example†

1. User is working in a system outside of TSDS Unique ID system to submit student data to the state.
2. User gets an error in the other application stating that a student does not have an identifier.
3. User requests an identifier from TSDS Unique ID directly from that other system by using that applications functionality.
4. Other system uses IDAssignmentV2 Web Service to request an identifier from TSDS Unique ID for Students.
5. TSDS Unique ID processes the request, stores the student information in the database, and returns the new or pre-existing identifier to the originating application.

† Indicates that the example provided is only one example of a possible scenario. Other scenarios may exist that could demonstrate the flow process for the web service.

Operations

assignId

The assignId operation of the IDAssignmentV2 services will assign an identifier or return potential matches for a submission, as well as update data as necessary.
**Input Elements**

- **STUDENT** - This element will represent the student details for the identifier assignment request. This will be Student or StudentV2 depending on the Web Service used. The student input elements are:

<table>
<thead>
<tr>
<th>Field/Element</th>
<th>Description</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSN</td>
<td><strong>Required.</strong>&lt;br&gt;<strong>Valid Values/Format:</strong> Must be 9 digits, can include “-”&lt;br&gt;but must be formatted correctly with three, two and four digits.&lt;br&gt;&lt;br&gt;<strong>Example:</strong> 444335555 OR 444-33-5555&lt;br&gt;Or 8 digits with the character “S” in front. Example S44335555</td>

- **USER ID - Required.** This value will be a string that will identify the user ID that performed the action. Must be a Super User account.

- **USER PASSWORD - Required.** This value will be the user ID’s password that performed the action. Must be a Super User account.
Output Elements

Upon completion of the request, the IDAssignmentResultV2 element is returned. This will be IDAssignmentResult IDAssignmentResultV2 depending on the service called. The IDAssignmentResultV2 output will have the following elements in it:

- **Status** – this is a string containing the status of the function call. For a full list of status values refer to the IDAssignmentV2 Status Table below.
- **StateStudentId** – use this property to get the state id assigned to the student.
- **StatePersonId** – (V3 only) use this property to get the state id assigned to the person
- **SubmissionId** – use this property to get the submission id assigned to the transaction.
- **BatchNumber** – use this property to get the batch number assigned to the transaction.
- **cdfMap** – used internally for CDFs.
- **aliasId** –this property returns the alias ID for the record.
- **PotentialNearMatches** – this property will return an array of PotentialMatch elements. The data that is returned in this array is for the near matching (master) records. Each near match element will have the following properties:
  a. **STATE STUDENT ID (stateStudentID)** – string with the state student Identifier of the matched record.
  b. **LAST NAME (lastName)** – the last name of the matched record.
  c. **FIRST NAME (firstName)** – the first name of the matched record.
  d. **MIDDLE NAME (middleName)** – the middle name of the matched record.
  e. **SUFFIX (suffixName)** – the suffix of the matched record.
  f. **GENDER (gender)** – the gender code of the matched record.
  g. **DATE OF BIRTH (dob)** – the date of birth of the matched record.
  h. **ETHNIC CODE (ethnicCode)** – the ethnic code of the matched record.
  i. **SOCIAL SECURITY NUMBER (ssn)** – the social security number of the matched record.
  j. **MATCH PROBABILITY (matchProbability)** – the match score ranges from Lower Near Match Threshold to Upper Near Match Threshold setting from System Properties.
  k. **COMMENTS (comments)** – the comments for the matched record.
  l. **CREATION DATE (createDate)** – the date the record was created.
  m. **CLAIM REQUIRED (claimRequired)** – indicates if a claim is required for the record. This can occur when Claiming is enabled.
  p. **SCHOOL YEAR (schoolYear)** – the school year of the matched record.
  q. **GRADE LEVEL (gradeLevel)** – the grade level of the matched record.
  r. **CDF NUMBERS ARRAY (cdfNumbersArray)** – the array of CDF by number (V2 only)
s. CDF VALUES ARRAY (cdfValuesArray) – the array of CDF values (V2 only)
t. CDF REF NUMBER (cdfRefNumber) (V2 only) – the internal reference to the CDF.
u. ALIAS ID (aliasID) (V2 only) – the alias ID of the matched record.
v. ALTERNATE SOURCE (alternateSource) (V2 only) – the alternate source of the matched record.
w. PREVIOUS LAST NAME (previousLastName) (V2 only) – the previous last name of the matched record.
x. SOURCE SIS CODE (sourceSISCode) (V2 only) – the source system of the matched record.
y. ETHNICITY INDICATOR (ethnicityIndicator) (V2 only) – the ethnic code for the matched record.
z. RACE 2 CODE (Race2Code) (V2 only) – the race 2 code value for the matched record.
aa. RACE 2 CODE Description (Race2CodeDesc) (V2 only) – the race 2 code value description for the matched record.
bb. RACE 3 CODE (Race3Code) (V2 only) – the race 3 code value for the matched record.
cc. RACE 3 CODE Description (Race3CodeDesc) (V2 only) – the race 3 code value description for the matched record.
dd. RACE 4 CODE (Race4Code) (V2 only) – the race 4 code value for the matched record.
ee. RACE 4 CODE Description (Race4CodeDesc) (V2 only) – the race 4 code value description for the matched record.
ff. RACE 5 CODE (Race5Code) (V2 only) – the race 5 code value for the matched record.
gg. RACE 5 CODE DESCRIPTION (Race5CodeDesc) (V2 only) – the race 5 code value description for the matched record

Each near match element in V3 will have the following properties:

a. COMMENTS (comments) – the comments for the matched record.
b. LAST NAME (lastName) – the last name of the matched record.
c. CREATION DATE (creationDate) - the creation date of the matched record.
d. LOCATION CODE (locationCode) - the location code of the matched record.
e. DATE OF BIRTH (dob) - the date of birth of the matched record.
f. ETHNIC CODE (ethnicCode) - the ethnic code of the matched record.
g. FIRST NAME (firstName) - the first name of the matched record.
h. GENDER (gender) - the gender of the matched record.
i. CLASSIFICATION (classification) - the classification of the matched record.
j. LAST NAME (lastName) - the last name of the matched record.
k. MATCH PROBABILITY (matchProbability) - the match probability of the matched record.
l. MIDDLE NAME (middleName) - the middle name of the matched record.
m. RELATION TYPE (relationType) - the relation type of the matched record.
n. BUILDING CODE (buildingCode) - the building code of the matched record.
o. RESIDENT LOCATION CODE (residentLocationCode) - the residentLocationCode of the matched record.
p. SSN (ssn) - the ssn of the matched record.
q. STATE PERSON ID (statePersonID) - the state person ID of the matched record.
r. NAME SUFFIX (nameSuffix) - the nameSuffix of the matched record.

s. CLAIM REQUIRED (claimRequired) – indicates if a claim is required for the record. This can occur when Claiming is enabled.

t. ENROLLMENT YEAR (enrollmentYear) - the enrollment year of the matched record.

u. PREVIOUS LAST NAME (previousLastName) - the previousLastName of the matched record.

v. SOURCE CODE (sourceCode) - the source code of the matched record.

w. ALIAS ID (aliasId) - the alias Id of the matched record.

x. ALTERNATE SOURCE (alternateSource) - the alternate source of the matched record.

y. ALTERNATE ID (alternateID) - the alternate ID of the matched record.

z. CDF REF NUMBER (cdfRefNumber) - the internal reference to the CDF.

aa. CDF VALUES ARRAY (cdfValuesArray) – array of CDF values of the matched record.

bb. CDF NUMBERS ARRAY (cdfNumbersArray) - the array of CDF by number.

c. ETHNICITY INDICATOR (ethnicityIndicator) - the ethnicityIndicator of the matched record.

dd. RACE2CODE (race2Code) - the race2Code of the matched record.

ee. RACE3CODE (race3Code) - the race3Code of the matched record.

ff. RACE4CODE (race4Code) - the race4Code of the matched record.

gg. RACE5CODE (race5Code) - the race5Code of the matched record.

hh. ETHNICITY INDICATOR DESC (ethnicityIndicatorDesc) - the description of ethnicity indicator of the matched record.

ii. ETHNIC CODE DESC (ethnicCodeDesc) - the description of the race code of the matched record.

jj. RACE2 CODE DESC (race2CodeDesc) - the description of the race 2 code of the matched record.

kk. RACE3 CODE DESC (race3CodeDesc) - the description of the race 3 code of the matched record.

ll. RACE4 CODE DESC (race4CodeDesc) - the description of the race 4 code of the matched record.

mm. RACE5 CODE DESC (race5CodeDesc) - the description of the race 5 code of the matched record.

nn. ETHNIC SUB GROUP (ethnicSubGroup) - the ethnic sub group of the matched record.

oo. MOTHERS MAIDEN NAME (mothersMaidenName) - the mothers maiden name of the matched record.

pp. FULLNAME (fullName) - the full name of the matched record.

qq. NICK NAME (nickName) - the nick name of the matched record.

rr. BIRTH LOCATION (birthLocation) - the birth location of the matched record.

ss. ADDRESS1 (address1) - the address 1 of the matched record.

tt. ADDRESS2 (address2) - the address 2 of the matched record.

uu. CITY (city) - the city of the matched record.

vv. STATE (state) - the state of the matched record.

ww. ZIP (zip) - the zip of the matched record.

xx. GEOCODE (geocode) - the geocode of the matched record.

yy. RESIDENCY STATUS (residencyStatus) - the residency status of the matched record.

zz. RESIDENCY EXPIRATION DATE (residencyExpirationDate) - the residency expiration date of the matched record.

aaa. HIGHEST DEGREE (highestDegree) - the highest degree of the matched record.
**Subject Matter Area (subjectMatterArea)** - the subject/matter area of the matched record.

**Degree Provider (degreeProvider)** - the degree provider of the matched record.

**Certificate Number (certificateNumber)** - the certificate number of the matched record.

**Certificate Type (certificateType)** - the certificate type of the matched record.

**Itinerant Flag (itinerantFlag)** - the itinerant flag of the matched record.

**Submission Purpose (submissionPurpose)** - the submission purpose of the matched record.

**Person Type (personType)** - the person type of the matched record.

**Active Flag (activeFlag)** - the active flag of the matched record.

**Source Refresh Date (sourceRefreshDate)** - the source refresh date of the matched record.

**Multiple Active Enrollment Count (multipleActiveEnCount)** - the multipleActiveEnCount of the matched record.

**Enrollment Status (enrollmentStatus)** - the enrollment status of the matched record.

**Entry Exit Date (entryExitDate)** - the entry/exit date of the matched record.

**Entry Exit Type (entryExitType)** - the entry/exit type of the matched record.

**Entry Exit Code (entryExitCode)** - the entry/exit code of the matched record.

**Entry Exit Verified Flag (entryExitVerifiedFlag)** - the entry/exit verified flag of the matched record.

**Salary (salary)** - the salary of the matched record.

**Hire Date (hireDate)** - the hire date of the matched record.

**Job Class Code (jobClassCode)** - the job class code of the matched record.

**Primary Job Assignment Code (jobAssignmentCodePrimary)** - the primary job assignment code of the matched record.

**Secondary Job Assignment Code (jobAssignmentCodeSecondary)** - the secondary job assignment code of the matched record.

**Tertiary Job Assignment Code (jobAssignmentCodeTertiary)** - the tertiary job assignment code of the matched record.

**Location Comments (locationComment)** - the location comments for the matched record.

**Location Process Status (locationProcessStatus)** - the locationProcessStatus of the matched record.

**Event Process Status (eventProcessStatus)** - the eventProcessStatus of the matched record.

- **fieldsWithErrors** — returns an array of field errors. The possible messages are:
  
  a. **LAST_NAME** – the submitted value was too long or null.
  b. **FIRST_NAME** – the submitted value was too long or null.
  c. **MIDDLE_NAME** – the submitted value was too long.
  d. **SUFFIX** – the submitted value was too long.
  e. **GENDER** – the submitted value was too long, invalid, or null.
  f. **DATE_OF_BIRTH** – the submitted value was too long, invalid, or null.
  g. **ETHNICITY** – the submitted value was too long or invalid.
  h. **SSN** – the submitted value was invalid.
i. GRADE_LEVEL - the submitted value was too long, invalid, or null.
j. LOCAL_STUDENT_ID – the submitted value was too long, invalid, or null.
k. SCHOOL_YEAR – the submitted value was too long, invalid, or null.
l. DISTRICT_CODE – the submitted value was too long, invalid, or null.
m. SCHOOL_CODE – the submitted value was too long, invalid, or null.
n. RES_DISTRICT_CODE – the submitted value was too long, invalid, or null.
o. STATE_STUDENT_ID – the submitted value was too long or invalid.
p. SOURCE_SYSTEM– the submitted value was too long or invalid. (V2 only)
q. ALTERNATE_SOURCE– the submitted value was too long or invalid. (V2 only)
r. ALTERNATE_ID – the submitted value was too long or invalid. (V2 only)
s. ALTERNATE_LAST_NAME - the submitted value was too long. (V2 only)
t. CDF_XXXXX – the submitted value was too long (V2 only). XXXXX stands for the name of the CDF field.
u. AGENCY_NOT_FOUND – the submitted value was invalid.
v. AGENCY_NOT_AUTHORIZED – the user is not authorized to access this agency
w. ETHNICITY/RACE: INVALID – the submitted value was invalid.
x. ETHNICITY/RACE: INVALID, REQUIRED – the value was not submitted.
y. ETHNICITY/RACE: DISABLED – a value was not expected.
z. RACE2_CODE – the submitted value was invalid.
aa. RACE3_CODE – the submitted value was invalid.
bb. RACE4_CODE – the submitted value was invalid.
c. RACE5_CODE – the submitted value was invalid.
dd. RACE2_CODE: DISABLED – the submitted value was not expected.
ee. RACE3_CODE: DISABLED – the submitted value was not expected.
ff. RACE4_CODE: DISABLED – the submitted value was not expected.
gg. RACE5_CODE: DISABLED – the submitted value was not expected.
hh. ETHNIC_SUB_GROUP – the submitted value was invalid.
ii. MOTHERS_MAIDEN_NAME – the submitted value was invalid.
jj. FULL_NAME – the submitted value was invalid.
kk. NICKNAME – the submitted value was invalid.
l. BIRTH_LOCATION – the submitted value was invalid.
mm. ADDRESS_1 – the submitted value was invalid.
nn. ADDRESS_2 – the submitted value was invalid.
oo. CITY – the submitted value was invalid.
pp. STATE – the submitted value was invalid.
qq. ZIP – the submitted value was invalid.
rr. GEOCODE – the submitted value was invalid.
ss. RESIDENCY_STATUS – the submitted value was invalid.
tt. RESIDENCY_EXPIRATION – the submitted value was invalid.
uu. HIGHEST_DEGREE – the submitted value was invalid.
vv. SUBJECT_MATTER_AREA – the submitted value was invalid.
ww. DEGREE_PROVIDER – the submitted value was invalid.
xx. CERTIFICATE_NUMBER – the submitted value was invalid.
yy. CERTIFICATE_TYPE – the submitted value was invalid.
zz. ITINERANT_FLAG – the submitted value was invalid.
aaa. SUBMISSION_PURPOSE – the submitted value was invalid.
bbb. PERSON_TYPE – the submitted value was invalid.
ccc. ACTIVE_FLAG – the submitted value was invalid.
ddd. ENROLLMENT_STATUS – the submitted value was invalid.
eee. ENTRY_EXIT_DATE – the submitted value was invalid.
fff. ENTRY_EXIT_TYPE – the submitted value was invalid.
ggg. ENTRY_EXIT_CODE – the submitted value was invalid.
hhh. ENTRY_EXIT_VERIFIED_FLAG – the submitted value was invalid.
iii. SALARY – the submitted value was invalid.
jjj. HIRE_DATE – the submitted value was invalid.
kkk. JOB_CLASS_CODE – the submitted value was invalid.
lll. JOB_ASSIGNMENT_CODE_PRIMARY – the submitted value was invalid.
mmm. JOB_ASSIGNMENT_CODE_SECONDARY – the submitted value was invalid.
mmm. JOB_ASSIGNMENT_CODE_SECONDARY – the submitted value was invalid.
nnn. JOB_ASSIGNMENT_CODE_TERTIARY – the submitted value was invalid.
ooo. JOB_ASSIGNMENT_CODE: JOB ASSIGNMENT GAP EXISTS
ppp. JOB_ASSIGNMENT_CODE: DUPLICATE JOB ASSIGNMENTS
qqq. LOCATION_COMMENT – the submitted value was invalid.
rrr. SOURCE_REFRESH_DATE – the submitted value was invalid.
sss. ETHNICITY: MULTIPLE SAME RACE EXISTS
ttt. ETHNICITY: RACE GAP EXISTS
uuu. ETHNICITY_INDICATOR: INVALID – the submitted value was invalid.
vvv. ETHNICITY_INDICATOR: INVALID FOR GRADE – the submitted value was invalid for the grade
www. ETHNICITY_INDICATOR: DISABLED – the submitted value was not expected.

NearMatchListV2 - Retrieving Near Match Lists

The Near Match List Web Service will return a list of near matches found by the TSDS Unique ID system for an input record submitted.

The Web Service will have one operation called NearMatchListV2. Upon submission of a request, the Web Service will return a NearMatchListResult element. The NearMatchListResult element will have a status and an array of PotentialMatch elements.

Process Flow Example†
1. User is working in a system outside of TSDS Unique ID to submit student data to the state.
2. User gets an error in the other application stating that a student does not have an identifier.
3. User requests an identifier from TSDS Unique ID directly from that other system by using that applications functionality.
4. Other system uses the IDAssignmentV2 Web Service to request an identifier from TSDS Unique ID.
5. TSDS Unique ID processes the request, finds one or more near matches/matches and returns the list of near matches to the other application.
6. User can view a list of near matches in the other system and resolve or can retrieve the list later.

† Indicates that the example provided is only one example of a possible scenario. Other scenarios may exist that could demonstrate the flow process for the web service.

Operations

getNearMatches
This operation will return potential match records that matched the submission record during the IDAssignmentV2 request.

Input Elements

- **SUBMISSION IDENTIFIER –Required.** This value will be the identifier that was assigned to submission record during IDAssignmentV2.
- **USER ID - Required.** This value will be a string that will identify the user ID that performed the action. Must be a Super User account.
- **USER PASSWORD - Required.** This value will be the user ID’s password that performed the action. Must be a Super User account password.

Output Elements

Upon completion of the NearMatchListV2 request, the NearMatchListResult element is returned. The NearMatchListResult element will have the following properties:

- **Status** – this is a string containing the status of the function call. For a full list of status values refer to the NearMatchListV2 Status Table below.
- **Array of PotentialMatchObjects** - Each near match element will have the following properties:
  a. **STATE STUDENT ID (STATESTUDENTID)** – string with the state student identifier of the matched record.
  b. **LAST NAME (LASTNAME)** – the last name of the matched record.
  c. **FIRST NAME (FIRSTNAME)** – the first name of the matched record.
  d. **MIDDLE NAME (MIDDLENAME)** – the middle name of the matched record.
  e. **SUFFIX (SUFFIXNAME)** – the suffix of the matched record.
f. GENDER (GENDER) – the gender code of the matched record.
g. DATE OF BIRTH (DOB) – the date of birth of the matched record.
h. ETHNIC CODE (ETHNICCODE) – the ethnic code of the matched record.
i. SOCIAL SECURITY NUMBER (SSN) – the social security number of the matched record.
j. MATCH PROBABILITY (MATCHPROBABILITY) – the match score ranges from Lower Near Match Threshold to Upper Near Match Threshold setting from System Properties.
k. COMMENTS (COMMENTS) – the comments for the matched record.
l. CREATION DATE (CREATIONDATE) – the date the record was created.
m. CLAIM REQUIRED (CLAIMREQUIRED) – indicates if a claim is required for the record. This can occur when Claiming is enabled.

n. DISTRICT CODE (DISTRICTCODE) – the District Code of the matched record.
o. SCHOOL CODE (SCHOOLCODE) – the School Code of the matched record.
p. SCHOOL YEAR (SCHOOLYEAR) – the school year of the matched record.
q. GRADE LEVEL (GRADELEVEL) – the grade level of the matched record.
r. CDF NUMBERS ARRAY (cdfNumbersArray) – the array of CDF by number (V2 only)
s. CDF VALUES ARRAY (cdfValuesArray) – the array of CDF values (V2 only)
t. CDF REF NUMBER (cdfRefNumber) (V2 only) – the internal reference to the CDF.
u. ALIAS ID (aliasID) (V2 only) – the alias ID of the matched record.
v. ALTERNATE SOURCE (alternateSource) (V2 only) – the alternate source of the matched record.
w. PREVIOUS LAST NAME (previousLastName) (V2 only) – the previous last name of the matched record.

x. SOURCE SIS CODE (sourceSISCode) (V2 only) – the source system of the matched record.
y. ETHNICITY INDICATOR (ethnicityIndicator) (V2 only) – the ethnic code for the matched record.
z. RACE 2 CODE (Race2Code) (V2 only) – the race 2 code value for the matched record.
aa. RACE 2 CODE Description (Race2CodeDesc) (V2 only) – the race 2 code value description for the matched record.
bb. RACE 3 CODE (Race3Code) (V2 only) – the race 3 code value for the matched record.
c. RACE 3 CODE Description (Race3CodeDesc) (V2 only) – the race 3 code value description for the matched record.

dd. RACE 4 CODE (Race4Code) (V2 only) – the race 4 code value for the matched record.
e. RACE 4 CODE Description (Race4CodeDesc) (V2 only) – the race 4 code value description for the matched record.
ff. RACE 5 CODE (Race5Code) (V2 only) – the race 5 code value for the matched record.
g. RACE 5 CODE DESCRIPTION (Race5CodeDesc) (V2 only) – the race 5 code value description for the matched record.
Each near match element will have the following properties in NearMatchListResultV3 objects:

a. STATE PERSON ID (statePersonId) – string with the state Identifier of the matched record.
b. LAST NAME (lastName) – the last name of the matched record.
c. FIRST NAME (firstName) – the first name of the matched record.
d. MIDDLE NAME (middleName) – the middle name of the matched record.
e. SUFFIX (suffixName) – the suffix of the matched record.
f. GENDER (gender) – the gender code of the matched record.
g. DATE OF BIRTH (dob) – the date of birth of the matched record.
h. ETHNIC CODE (ethnicCode) – the ethnic code of the matched record.
i. SOCIAL SECURITY NUMBER (ssn) – the social security number of the matched record.
j. MATCH PROBABILITY (matchProbability) – the match score ranges from Lower Near Match Threshold to Upper Near Match Threshold setting from System Properties.
k. COMMENTS (comments) – the comments for the matched record.
l. CREATION DATE (creationDate) – the date the record was created.
m. CLAIM REQUIRED (claimRequired) – indicates if a claim is required for the record. This can occur when Claiming is enabled.
o. LOCATION CODE (locationCode) – the Location Code of the matched record.
p. RESIDENT LOCATION CODE (residentLocationCode) – the Resident Location Code of the matched record.
q. ENROLLMENT YEAR (enrollmentYear) – the enrollment year of the matched record.
r. CLASSIFICATION (classification) – the classification of the matched record.
s. CDF NUMBERS ARRAY (cdfNumbersArray) – the array of CDF by number
t. CDF VALUES ARRAY (cdfValuesArray) – the array of CDF values…
gg. RACE 4 CODE DESCRIPTION (race4CodeDesc) – the race 4 code value description for the matched record.

hh. RACE 5 CODE (race5Code) – the race 5 code value for the matched record.

ii. RACE 5 CODE DESCRIPTION (race5CodeDesc) – the race 5 code value description for the matched record

jj. ETHNIC SUB GROUP (ethnicSubGroup) – the race sub group for the matched record

kk. MOTHERS MAIDEN NAME (mothersMaidenName) – the mothers maiden name for the matched record

ll. FULL NAME (fullName) – the full name for the matched record

mm. NICK NAME (nickname) – the nick name for the matched record

nn. BIRTH LOCATION (birthLocation) – the birth location for the matched record

oo. ADDRESS 1 (address1) – the address for the matched record

pp. ADDRESS 2 (address2) – the address 2 for the matched record

qq. CITY (city) – the city for the matched record

rr. STATE (state) – the state code for the matched record

ss. ZIP (zip) – the zip code for the matched record

tt. GEO CODE (geocode) – the geo code for the matched record

uu. RESIDENCY STATUS (residencyStatus) – the residency status code for the matched record

vv. RESIDENCY EXPIRATION DATE (residencyExpirationDate) – the residency expiration date for the matched record

ww. HIGHEST DEGREE (highestDegree) – the highest degree code for the matched record

xx. SUBJECT MATTER AREA (subjectMatterArea) – the subject matter code for the matched record

yy. DEGREE PROVIDER (degreeProvider) – the degree provider for the matched record

zz. CERTIFICATE NUMBER (certificateNumber) – the certificate number for the matched record

aaa. CERTIFICATE TYPE (certificateType) – the certificate type for the matched record

bbb. ITINERANT FLAG (itinerantFlag) – the itinerant flag for the matched record

cccc. SUBMISSION PURPOSE (submissionPurpose) – the submission purpose for the matched record

dddd. PERSON TYPE (personType) – the person type for the matched record

eee. ACTIVE FLAG (activeFlag) – the active flag for the matched record

fff. SOURCE REFRESH DATE (sourceRefreshDate) – the source refresh date for the matched record

ggg. MULTIPLE ACTIVE ENROLLMENT COUNT (multipleActiveEnCount) – the active enrollment count for the matched record

hhh. ENROLLMENT STATUS (enrollmentStatus) – the enrollment status for the matched record

iii. ENTRY EXIT DATE (entryExitDate) – the entry exit date for the matched record

jjj. ENTRY EXIT TYPE (entryExitType) – the entry exit type for the matched record

kkk. ENTRY EXIT CODE (entryExitCode) – the entry exit code for the matched record

lll. ENTRY EXIT VERIFIED FLAG (entryExitVerifiedFlag) – the entry exit verified flag for the matched record
mmm. SALARY (salary) – the salary for the matched record
nnn. HIRE DATE (hireDate) – the hire date for the matched record
ooo. JOB CLASS CODE (jobClassCode) – the job class code for the matched record
ppp. JOB ASSIGNMENT PRIMARY (jobAssignmentCodePrimary) – the job assignment code for the matched record
qqq. JOB ASSIGNMENT CODE SECONDARY (jobAssignmentCodeSecondary) – the job assignment code for the matched record
rrr. JOB ASSIGNMENT CODE TERTIARY (jobAssignmentCodeTertiary) – the job assignment code for the matched record
sss. LOCATION COMMENT (locationComment) – the location comment for the matched record
ttt. LOCATION PROCESS STATUS (locationProcessStatus) – the location process status for the matched record
uuu. EVENT PROCESS STATUS (eventProcessStatus) – the event process status for the matched record

</tbody>
</table>

NearMatchResolutionsV2 – Near Match Decisions

The Near Match Resolution Web Service will accept and process a near match decision. The Web Service will perform one of the following actions based on the decision:

1. Cancel – cancel the assignment request.
2. Assign Pre-Existing Identifier – assign an already existing state student identifier to the submission record.
3. Create New ID – create a new state student identifier for the submission record.

Process Flow Example†

1. User is working in a system outside of TSDS Unique ID to submit student data to the state.
2. User gets an error in the other application stating that a student does not have an identifier.
3. User requests an identifier from TSDS Unique ID directly from that other system by using that applications functionality.
4. Other system uses IDAssignmentV2 Web Service to request an identifier from TSDS Unique ID.
5. TSDS Unique ID processes the request, finds one or more near matches/matches and returns the list of near matches to the other application.
6. User is presented with the list of near matches in the other system and makes a decision.
7. Other system uses web services to submit the near match decision.
8. TSDS Unique ID processes and stores the near match decision.

† Indicates that the example provided is only one example of a possible scenario. Other scenarios may exist that could demonstrate the flow process for the web service.

Operations

cancel

This operation will cancel the input record based on the submission id.
Input Elements

- **SUBMISSION IDENTIFIER - Required.** This value will be the submission identifier that was previously passed back from the IDAssignmentV2 web service.
- **STATE STUDENT ID - Should be left blank.**
- **USER IDENTIFIER - Required.** This value will be a string that will identify the user ID that performed the action.
- **USER PASSWORD - Required.** This value will be a string that will identify the user password that performed the action.

Output Elements

Upon completion of the cancel request, the NearMatchListResult element is returned. The NearMatchListResult element will have the following properties:

- **Status** – this is a string containing the status of the function call. For a full list of status values refer to the NearMatchResolutionV2 Status Table below.

assignId

This operation will assign an already existing state student identifier to the input record.

Input Elements

- **SUBMISSION IDENTIFIER - Required.** This value will be the submission identifier that was previously passed back from the IDAssignmentV2 web service.
- **STATE STUDENT ID - Required.** The identifier selected to be assigned to the input record.
- **USER IDENTIFIER - Required.** This value will be a string that will identify the user ID that performed the action. Must be a Super User account.
- **USER PASSWORD - Required.** This value will be a string that will identify the user password that performed the action. Must be a Super User account password.

Output Elements

Upon completion of the assignment request, the NearMatchListResult element is returned. The NearMatchListResult element will have the following properties:

- **Status** – this is a string containing the status of the function call. For a full list of status values refer to the NearMatchResolutionV2 Status Table below.

createNewID

This operation will create a new state student identifier for the input record.

Input Elements

- **SUBMISSION IDENTIFIER - Required.** This value will be the submission identifier that was previously passed back from the IDAssignmentV2 web service.
- **STATE STUDENT ID - Should be left blank.**
- **USER IDENTIFIER - Required.** This value will be a string that will identify the user ID that performed the action. Must be a Super User account.
- **USER PASSWORD - Required.** This value will be a string that will identify the user password that performed the action. Must be a Super User account password.

Output Elements

Upon completion of the createNewId request, the NearMatchListResult Object is returned. The NearMatchListResult object will have the following properties:

- **Status** – this is a string containing the status of the function call. For a full list of status values refer to the NearMatchResolutionV2 Object Status Table below.
- StateStudentId – use this property to get the state id assigned to the student.
- AliasID – use this property to obtain the alias ID.

<td>FAILED_INVALID_INPUT_ID</td>
<td>The submission id is invalid.</td>
</tr>
<tr>
<td>SUCCESS</td>
<td>The call was successful.</td>
</tr>
</tbody>
</table>
StudentSearch – Searching for a Student / Staff

The Student Search Web Service will return a list of potential matches found by the TSDS Unique ID system for the input record submitted. This Web Service works similarly to the IDAssignmentV2 Web Services, but it does not assign identifiers in any case.

The Web Service will have one operation called searchStudent. Upon submission of a request, the Web Service will return a StudentSearchResult element. This element will have a status and an array of PotentialMatch elements. This array includes a match probability score that can be utilized to determine a match.

Note- records should not be considered matches if they are not higher than the Upper Near Match Threshold configured in the system. Records in a multiple match scenario should be reviewed before being accepted as a match. This Web Service is only functional with TSDS UID System 7 or above.

Operations

searchStudent

This operation will return potential match records that matched the submission record during the search request.

searchWithIDExactMatch

This operation will try to do an exact match with student demographic information when a valid STATE_STUDENT_ID is submitted in the STUDENTINPUT element. If an exact match is found, the result object containing single match record is returned. If exact match fails, result object will contain no matches. It behaves exactly like searchStudent operation when STATE_STUDENT_ID is empty or invalid. Unlike the regular Exact Match Rule, this does not return a list of potential matches. Refer to the STUDENTINPUT and output elements below.

Input Elements

- STUDENTINPUT-This element will represent the student to search. The student input elements are:

<table>
<thead>

jobAssignmentCodePrimary Optional.  
Valid Values/Format: Length must be less than or equal to 100 characters.

jobAssignmentCodeSecondary Optional.  
Valid Values/Format: Length must be less than or equal to 100 characters.

jobAssignmentCodeTertiary Optional.  
Valid Values/Format: Length must be less than or equal to 100 characters.

locationComment Optional.  
Valid Values/Format: Length must be less than or equal to 100 characters.

1. USER ID - Required. This value will be a string that will identify the user ID that performed the action. Must be a Super User account.

2. USER PASSWORD - Required. This value will be the user ID’s password that performed the action. Must be a Super User account password.

Output Elements:
Upon completion of the StudentSearch request, the StudentSearchResult element is returned. The StudentSearchResult element will have the following properties:

1. Status – this is a string containing the status of the function call. For a full list of status values refer to the IDAssignmentV2 Status Table below.
2. StateStudentId – use this property to get the state id assigned to the student.
3. SubmissionId – use this property to get the submission id assigned to the transaction.
4. BatchNumber – use this property to get the batch number assigned to the transaction.
5. cdfMap – used internally for CDFs.
6. aliasId – this property will return the alias ID.
7. PotentialNearMatches – this property will return an array of PotentialMatch elements. The data that is returned in this array is for the near matching (master) records. Each near match element will have the following properties:
a. STATE STUDENT ID (stateStudentID) – string with the state student Identifier of the matched record.
b. LAST NAME (lastName) – the last name of the matched record.
c. FIRST NAME (firstName) – the first name of the matched record.
d. MIDDLE NAME (middleName) – the middle name of the matched record.
e. SUFFIX (suffixName) – the suffix of the matched record.
f. GENDER (gender) – the gender code of the matched record.
g. DATE OF BIRTH (dob) – the date of birth of the matched record.
h. ETHNIC CODE (ethnicCode) – the ethnic code of the matched record.
i. SOCIAL SECURITY NUMBER (ssn) – the social security number of the matched record.
j. MATCH PROBABILITY (matchProbability) – the match score ranges from Lower Near Match Threshold to Upper Near Match Threshold setting from System Properties.
k. COMMENTS (comments) – the comments for the matched record.
l. CREATION DATE (createDate) – the date the record was created.
m. CLAIM REQUIRED (claimRequired) – indicates if a claim is required for the record. This can occur when Claiming is enabled.
n. DISTRICT CODE (districtCode) – the District Code of the matched record.
o. SCHOOL CODE (schoolCode) – the School Code of the matched record.
p. SCHOOL YEAR (schoolYear) – the school year of the matched record.
q. GRADE LEVEL (gradeLevel) – the grade level of the matched record.
r. CDF NUMBERS ARRAY (cdfNumbersArray) – the array of CDF by number (V2 only)
s. CDF VALUES ARRAY (cdfValuesArray) – the array of CDF values (V2 only)
t. CDF REF NUMBER (cdfRefNumber) (V2 only) – the internal reference to the CDF.
u. ALIAS ID (aliasID) (V2 only) – the alias ID of the matched record.
v. ALTERNATE SOURCE (alternateSource) (V2 only) – the alternate source of the matched record.
w. PREVIOUS LAST NAME (previousLastName) (V2 only) – the previous last name of the matched record.
x. SOURCE SIS CODE (sourceSISCode) (V2 only) – the source system of the matched record.
y. ETHNICITY INDICATOR (ethnicityIndicator) (V2 only) – the ethnic code for the matched record.
z. RACE 2 CODE (Race2Code) (V2 only) – the race 2 code value for the matched record.
aa. RACE 2 CODE Description (Race2CodeDesc) (V2 only) – the race 2 code value description for the matched record.
bb. RACE 3 CODE (Race3Code) (V2 only) – the race 3 code value for the matched record.
c. RACE 3 CODE Description (Race3CodeDesc) (V2 only) – the race 3 code value description for the matched record.
dd. RACE 4 CODE (Race4Code) (V2 only) – the race 4 code value for the matched record.
ee. RACE 4 CODE Description (Race4CodeDesc) (V2 only) – the race 4 code value description for the matched record.
ff. RACE 5 CODE (Race5Code) (V2 only) – the race 5 code value for the matched record.
gg. RACE 5 CODE DESCRIPTION (Race2CodeDesc) (V2 only) – the race 5 code value description for the matched record

Each near match element will have the following properties in StudentSearchResultV3(V3 only) objects:

a. STATE PERSON ID (statePersonId) – string with the state Identifier of the matched record.
b. LAST NAME (lastName) – the last name of the matched record.
c. FIRST NAME (firstName) – the first name of the matched record.
d. MIDDLE NAME (middleName) – the middle name of the matched record.
e. SUFFIX (suffixName) – the suffix of the matched record.
f. GENDER (gender) – the gender code of the matched record.
g. DATE OF BIRTH (dob) – the date of birth of the matched record.
h. ETHNIC CODE (ethnicCode) – the ethnic code of the matched record.
i. SOCIAL SECURITY NUMBER (ssn) – the social security number of the matched record.
j. MATCH PROBABILITY (matchProbability) – the match score ranges from Lower Near Match Threshold to Upper Near Match Threshold setting from System Properties.
k. COMMENTS (comments) – the comments for the matched record.
l. CREATION DATE (creationDate) – the date the record was created.
m. CLAIM REQUIRED (claimRequired) – indicates if a claim is required for the record. This can occur when Claiming is enabled.
o. LOCATION CODE (locationCode) – the Location Code of the matched record.
p. RESIDENT LOCATION CODE (residentLocationCode) – the Resident Location Code of the matched record.
q. ENROLLMENT YEAR (enrollmentYear) – the enrollment year of the matched record.
r. CLASSIFICATION (classification) – the classification of the matched record.
s. CDF NUMBERS ARRAY (cdfNumbersArray) – the array of CDF by number
t. CDF VALUES ARRAY (cdfValuesArray) – the array of CDF values
u. CDF REF NUMBER (cdfRefNumber) – the internal reference to the CDF.
v. ALIAS ID (aliasId) – the alias ID of the matched record.
w. ALTERNATE SOURCE (alternateSource) – the alternate source of the matched record.
x. PREVIOUS LAST NAME (previousLastName) – the previous last name of the matched record.
y. SOURCE CODE (sourceCode) – the source system of the matched record.
z. ETHNICITY INDICATOR (ethnicityIndicator) – the ethnic code for the matched record.
aa. ETHNICITY INDICATOR DESCRIPTION (ethnicityIndicatorDesc) – the ethnic code value description for the matched record.
bb. RACE 2 CODE (race2Code) – the race 2 code value for the matched record.
cc. RACE 2 CODE DESCRIPTION (race2CodeDesc) – the race 2 code value description for the matched record.
dd. RACE 3 CODE (race3Code) – the race 3 code value for the matched record.

e. RACE 3 CODE DESCRIPTION (race3CodeDesc) – the race 3 code value description for the matched record

ff. RACE 4 CODE (race4Code) – the race 4 code value for the matched record.

g. RACE 4 CODE DESCRIPTION (race4CodeDesc) – the race 4 code value description for the matched record.

hh. RACE 5 CODE (race5Code) – the race 5 code value for the matched record.

ii. RACE 5 CODE DESCRIPTION (race5CodeDesc) – the race 5 code value description for the matched record

jj. ETHNIC SUB GROUP (ethnicSubGroup) – the race sub group for the matched record

kk. MOTHERS MAIDEN NAME (mothersMaidenName) – the mother’s maiden name for the matched record

ll. FULL NAME (fullName) – the full name for the matched record

mm. NICK NAME (nickname) – the nick name for the matched record

nn. BIRTH LOCATION (birthLocation) – the birth location for the matched record

oo. ADDRESS 1 (address1) – the address for the matched record

pp. ADDRESS 2 (address2) – the address 2 for the matched record

qq. CITY (city) – the city for the matched record

rr. STATE (state) – the state code for the matched record

ss. ZIP (zip) – the zip code for the matched record

tt. GEO CODE (geocode) – the geo code for the matched record

uu. RESIDENCY STATUS (residencyStatus) – the residency status code for the matched record

vv. RESIDENCY EXPIRATION DATE (residencyExpirationDate) – the residency expiration date for the matched record

ww. HIGHEST DEGREE (highestDegree) – the highest degree code for the matched record

xx. SUBJECT MATTER AREA (subjectMatterArea) – the subject matter code for the matched record

yy. DEGREE PROVIDER (degreeProvider) – the degree provider for the matched record

zz. CERTIFICATE NUMBER (certificateNumber) – the certificate number for the matched record

aaa. CERTIFICATE TYPE (certificateType) – the certificate type for the matched record

bbb. ITINERANT FLAG (itinerantFlag) – the itinerant flag for the matched record

ccc. SUBMISSION PURPOSE (submissionPurpose) – the submission purpose for the matched record

ddd. PERSON TYPE (personType) – the person type for the matched record

eee. ACTIVE FLAG (activeFlag) – the active flag for the matched record

fff. SOURCE REFRESH DATE (sourceRefreshDate) – the source refresh date for the matched record

ggg. MULTIPLE ACTIVE ENROLLMENT COUNT (multipleActiveEnCount) – the active enrollment count for the matched record

hhh. ENROLLMENT STATUS (enrollmentStatus) – the enrollment status for the matched record
iii. ENTRY EXIT DATE (entryExitDate) – the entry exit date for the matched record
jjj. ENTRY EXIT TYPE (entryExitType) – the entry exit type for the matched record
kkk. ENTRY EXIT CODE (entryExitCode) – the entry exit code for the matched record

III. ENTRY EXIT VERIFIED FLAG (entryExitVerifiedFlag) – the entry exit verified flag for the matched record

mmm. SALARY (salary) – the salary for the matched record

nnn. HIRE DATE (hireDate) – the hire date for the matched record

ooo. JOB CLASS CODE (jobClassCode) – the job class code for the matched record

ppp. JOB ASSIGNMENT PRIMARY (jobAssignmentCodePrimary) – the job assignment code for the matched record

qqq. JOB ASSIGNMENT CODE SECONDARY (jobAssignmentCodeSecondary) – the job assignment code for the matched record

rrr. JOB ASSIGNMENT CODE TERTIARY (jobAssignmentCodeTertiary) – the job assignment code for the matched record

sss. LOCATION COMMENT (locationComment) – the location comment for the matched record

ttt. LOCATION PROCESS STATUS (locationProcessStatus) – the location process status for the matched record

uuu. EVENT PROCESS STATUS (eventProcessStatus) – the event process status for the matched record

- **fieldsWithErrors** – returns an array of field errors. The possible messages are:
  a. LAST_NAME – the submitted value was too long or null.
  b. FIRST_NAME – the submitted value was too long or null.
  c. MIDDLE_NAME – the submitted value was too long.
  d. SUFFIX – the submitted value was too long.
  e. GENDER – the submitted value was too long, invalid, or null.
  f. DATE_OF_BIRTH – the submitted value was too long, invalid, or null.
  g. ETHNICITY – the submitted value was too long or invalid.
  h. GRADE_LEVEL - the submitted value was too long, invalid, or null.
  i. LOCAL_STUDENT_ID – the submitted value was too long, invalid, or null.
  j. SCHOOL_YEAR – the submitted value was too long, invalid, or null.
  k. DISTRICT_CODE – the submitted value was too long, invalid, or null.
  l. SCHOOL_CODE – the submitted value was too long, invalid, or null.
  m. RES_DISTRICT_CODE – the submitted value was too long, invalid, or null.
  n. SSN – the submitted value was invalid.
  o. STATE_STUDENT_ID – the submitted value was too long or invalid.
  p. SOURCE_SYSTEM – the submitted value was too long or invalid. (V2 only)
  q. ALTERNATE_SOURCE – the submitted value was too long or invalid. (V2 only)
  r. ALTERNATE_ID – the submitted value was invalid.
s. ALTERNATE_LAST_NAME - the submitted value was too long. (V2 only)

t. CDF_XXXX – the submitted value was too long (V2 only). XXXX stands for the name of the CDF with error.

u. AGENCY_NOT_FOUND – the submitted value was invalid.

v. AGENCY_NOT_AUTHORIZED – the user is not authorized to access this agency.

<td>The call was successful and no match was found.</td>
</tr>
<tr>
<td>FAILED_VALIDATION</td>
<td>The submission failed data validation.</td>
</tr>
<tr>
<td>LOCKOUT</td>
<td>The submission failed data validation. When the system is locked out due to an Administrator lockout or forced lockout by a Matching Engine issue, the lockout status will be returned.</td>
</tr>
</tbody>
</table>
**BatchInfoSearch – Searching for a Student / Staff**

The Batch Info Search Web Service will return batch information for single record batches in TSDS Unique ID system for the input record submitted. TSDS Unique ID Version 7.0 or above is required for this Web Service.

The Web Service will have one operation called getBatchInformation. Upon submission of a request, the Web Service will return a BatchInfoResult element. This element will have a status and other batch information as described below.

**Operations**

getBatchInformation

This operation will return potential match records that matched the submission record during the search request.

**Input Elements**

1. **BATCHNUMBER** - This element will represent the batch number to search. It must be a valid number.
2. **USER ID - Required.** This value will be a string that will identify the user ID that performed the action. Must be a Super User account.
3. **USER PASSWORD - Required.** This value will be the user ID’s password that performed the action. Must be a Super User account password.

**Output Elements:**

Upon completion of the BatchInfo request, the BatchInfoResult element is returned. The BatchInfoResult element will have the following properties:

1. **Status** – this is a string containing the status of the function call. For a full list of status values refer to the IDAssignmentV2 Status Table below.
2. **StateStudentId** – use this property to get the state id assigned to the student.
3. **StatePersonId** – use this property to get the state id assigned to the student. (V3 only)
4. **BatchNumber** – use this property to get the batch number assigned to the transaction.
5. **BatchStatus** – use this property to get the batch status for the requested batch. For batch status information, refer to the Batch Status table below.
6. **nearMatchCount** - use this property to get the total number of near match records in the batch.
7. **totalNumberRecords** – use this property to get the total number of records in the batch. This should always equal 1.
8. **transactionStatus** – use this property to get the transaction status of the record. Refer to the numeric values in the “IDAssignmentV2 Transaction Status Table” above.

Appendix A – Soap Message Examples

IDAssignmentV2 Request – New ID Example

The sample below demonstrates a SOAP request for a new ID assignment using the IDAssignmentV2 Web Service:

```xml
<?xml version="1.0" encoding="UTF-8" ?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
                    xmlns:q0="http://com.escholar.ws"
                    xmlns:xsd="http://www.w3.org/2001/XMLSchema"
                    xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns0:assignId xmlns:ns0=http://ws.escholar.com
                   soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">      
      <student xsi:type="q0:Student">
        <SSN xsi:type="xsd:string"/>
        <birthDate xsi:type="xsd:string">05/01/1988</birthDate>
        <gender xsi:type="xsd:string">M</gender>
        <districtCode xsi:type="xsd:string">123456</districtCode>
        <gradeLevel xsi:type="xsd:string">10</gradeLevel>
        <localStudentId xsi:type="xsd:string">1113322</localStudentId>
        <stateStudentId xsi:type="xsd:string"/>
        <studentFirstName xsi:type="xsd:string">Mira</studentFirstName>
        <studentLastName xsi:type="xsd:string">Rauen</studentLastName>
        <studentMiddleName xsi:type="xsd:string"/>
        <studentSuffix xsi:type="xsd:string"/>
      </student>
      <userId xsi:type="xsd:string">*****</userId>
      <password xsi:type="xsd:string">*****</password>
    </ns0:assignId>
  </soapenv:Body>
</soapenv:Envelope>
```

IDAssignmentV3 Request – New ID Example

The sample below demonstrates a SOAP request for a new ID assignment using the IDAssignmentV3 Web Service:

```xml
<?xml version="1.0" encoding="UTF-8" ?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
                    xmlns:q0="http://com.escholar.ws"
                    xmlns:xsd="http://www.w3.org/2001/XMLSchema"
                    xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns0:assignId xmlns:ns0=http://ws.escholar.com
                   soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">      
      <student xsi:type="q0:Student">
        <SSN xsi:type="xsd:string"/>
        <birthDate xsi:type="xsd:string">05/01/1988</birthDate>
        <gender xsi:type="xsd:string">M</gender>
        <classification xsi:type="xsd:string">20</classification>
        <localPersonId xsi:type="xsd:string">1113322</localPersonId>
      </student>
      <userId xsi:type="xsd:string">*****</userId>
      <password xsi:type="xsd:string">*****</password>
    </ns0:assignId>
  </soapenv:Body>
</soapenv:Envelope>
```
IDAssignmentV2 Response – New ID Example

The sample below demonstrates the SOAP response to the above IDAssignmentV2 submission. The request did not include any data issues and there were no matches, so the response provided the new ID for assignment.

```xml
<soapenv:Envelope
  xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
  xmlns:xsd="http://www.w3.org/2001/XMLSchema"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns1:assignIdResponse
      xmlns:ns1="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <assignIdReturn href="#id0"/>
    </ns1:assignIdResponse>
    <multiRef
      xmlns:ns2="http://com.escholar.ws"
      xmlns:soapenc="http://schemas.xmlsoap.org/soap/encoding/"
      id="#id0" soapenc:root="0"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/"
      xsi:type="ns2:IDAssignmentResultV2">
      <batchNumber xsi:type="xsd:string">266</batchNumber>
      <fieldsWithErrors xsi:nil="true" xsi:type="soapenc:Array"/>
      <potentialNearMatches
        xmlns:ns3="http://www.escholar.com"
        xsi:nil="true" xsi:type="ns3:NearMatchArray"/>
      <stateStudentId xsi:type="xsd:string">5202763107</stateStudentId>
      <status xsi:type="xsd:string">05</status>
      <submissionId xsi:type="xsd:string">1164</submissionId>
    </multiRef>
  </soapenv:Body>
</soapenv:Envelope>
```

IDAssignmentV3 Response – New ID Example

The sample below demonstrates the SOAP response to the above IDAssignmentV2 submission. The request did not include any data issues and there were no matches, so the response provided the new ID for assignment.

```xml
<soapenv:Envelope
  xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
  xmlns:xsd="http://www.w3.org/2001/XMLSchema"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns1:assignIdResponse
      xmlns:ns1="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <assignIdReturn href="#id0"/>
    </ns1:assignIdResponse>
  </soapenv:Body>
</soapenv:Envelope>
```
<assignIdResponse>
  <assignIdReturn href="#id0"/>
</ns1:assignIdResponse>
<multiRef xmlns:ns2="http://com.escholar.ws"
  xmlns:soapenc="http://schemas.xmlsoap.org/soap/encoding/"
  id="id0"
  soapenc:root="0"
  soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/"
  xsi:type="ns2:IDAssignmentResultV3">
  <batchNumber xsi:type="xsd:string">266</batchNumber>
  <fieldsWithErrors xsi:nil="true" xsi:type="soapenc:Array"/>
  <potentialNearMatches xmlns:ns3="http://www.escholar.com"
    xsi:nil="true" xsi:type="ns3:NearMatchArray"/>
  <statePersonId xsi:type="xsd:string">5202763107</stateStudentId>
  <status xsi:type="xsd:string">05</status>
  <submissionId xsi:type="xsd:string">1164</submissionId>
</multiRef>
</soapenv:Body>
</soapenv:Envelope
IDAssignmentV2 Request – Match List Found Example

The sample below demonstrates a SOAP request for a new ID assignment using the
IDAssignmentV2 Web Service where matching records were found:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope
   xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/
   xmlns:q0="http://com.escholar.ws"
   xmlns:xsd="http://www.w3.org/2001/XMLSchema"
   xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns0:assignId
      xmlns:ns0="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <student xsi:type="q0:Student">
        <SSN xsi:type="xsd:string"/>05/01/1988</birthDate>
        <districtCode xsi:type="xsd:string">123456</districtCode>
        <gender xsi:type="xsd:string">M</gender>
        <gradeLevel xsi:type="xsd:string">10</gradeLevel>
        <localStudentId xsi:type="xsd:string">3433322</localStudentId>
        <residentDistrictCode xsi:type="xsd:string">0009</residentDistrictCode>
        <schoolCode xsi:type="xsd:string">123456789</schoolCode>
        <schoolYear xsi:type="xsd:string">2007</schoolYear>
        <stateStudentId xsi:type="xsd:string"/>
        <studentFirstName xsi:type="xsd:string">Michael</studentFirstName>
        <studentLastName xsi:type="xsd:string">Jordin</studentLastName>
        <studentMiddleName xsi:type="xsd:string"/>
        <studentSuffix xsi:type="xsd:string"/>
      </student>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:assignId>
  </soapenv:Body>
</soapenv:Envelope>
```
**IDAAssignmentV3 Request – Match List Found Example**

The sample below demonstrates a SOAP request for a new ID assignment using the IDAssignmentV3 Web Service where matching records were found:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/
xmlns:q0="http://com.escholar.ws" xmlns:xsd="http://www.w3.org/2001/XMLSchema"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
    <soapenv:Body>
        <ns0:assignId xmlns:ns0="http://ws.escholar.com"
soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
            <student xsi:type="q0:Student">
                <SSN xsi:type="xsd:string"></SSN>
                <birthDate xsi:type="xsd:string">05/01/1988</birthDate>
                <gender xsi:type="xsd:string">M</gender>
                <classification xsi:type="xsd:string">20</classification>
                <localPersonId xsi:type="xsd:string">1113322</localPersonId>
                <residentLocationCode xsi:type="xsd:string">0009</residentLocationCode>
                <buildingCode xsi:type="xsd:string">123456789</buildingCode>
                <enrollmentYear xsi:type="xsd:string">2007</enrollmentYear>
                <statePersonId xsi:type="xsd:string"></statePersonId>
                <firstName xsi:type="xsd:string">Mira</firstName>
                <lastName xsi:type="xsd:string">Rauen</lastName>
                <middleName xsi:type="xsd:string"></middleName>
                <nameSuffix xsi:type="xsd:string"></nameSuffix>
            </student>
            <userId xsi:type="xsd:string">****</userId>
            <password xsi:type="xsd:string">****</password>
        </ns0:assignId>
    </soapenv:Body>
</soapenv:Envelope>
```
**IDAssignmentV2 Response – Match List Found Example**

The sample below demonstrates the SOAP response to the above IDAssignmentV2 Match List Found sample. The request did not include any data issues and but did include matches. The near match list was returned, including a submission ID:

```xml
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
 xmlns:xsd="http://www.w3.org/2001/XMLSchema"
 xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">

      <submissionId xsi:type="xsd:string">1163</submissionId>
    </ns1:assignIdResponse>
  </soapenv:Body>
</soapenv:Envelope>
```
NearMatchListV2 Request - Existing Near Match List

The sample below demonstrates a SOAP request for a Near Match List using the NearMatchListV2 Web Service. This example uses the submission information listed the “IDAssignmentV2 Response – Match List Found Example” above.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:xsd="http://www.w3.org/2001/XMLSchema"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns0:getNearMatches xmlns:ns0="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/"/>
      <submissionId xsi:type="xsd:string">1163</submissionId>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:getNearMatches>
  </soapenv:Body>
</soapenv:Envelope>
```

NearMatchListV3 Request - Existing Near Match List

The sample below demonstrates a SOAP request for a Near Match List using the NearMatchListV2 Web Service. This example uses the submission information listed the “IDAssignmentV3 Response – Match List Found Example” above.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:xsd="http://www.w3.org/2001/XMLSchema"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns0:getNearMatches xmlns:ns0="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/"/>
      <submissionId xsi:type="xsd:string">1163</submissionId>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:getNearMatches>
  </soapenv:Body>
</soapenv:Envelope>
```
NearMatchListV2 Response – Existing Near Match List

This sample demonstrates the SOAP response for the above NearMatchListV2 request.

```xml
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
    xmlns:xsd="http://www.w3.org/2001/XMLSchema"

</soapenv:Envelope>
```
NearMatchResolutionV2 Request – Create a New ID

This sample demonstrates a SOAP request to create a new ID from a near match list.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope
 xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
 xmlns:xsd="http://www.w3.org/2001/XMLSchema"
 xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns0:assignId
      xmlns:ns0="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <tranSerialNumber xsi:type="xsd:string">1184</tranSerialNumber>
      <stateStudentId xsi:type="xsd:string">6241478796</stateStudentId>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:assignId>
  </soapenv:Body>
</soapenv:Envelope>
```

NearMatchResolutionV3 Request – Create a New ID

This sample demonstrates a SOAP request to create a new ID from a near match list.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope
 xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
 xmlns:xsd="http://www.w3.org/2001/XMLSchema"
 xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns0:assignId
      xmlns:ns0="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <tranSerialNumber xsi:type="xsd:string">1184</tranSerialNumber>
    </ns0:assignId>
  </soapenv:Body>
</soapenv:Envelope>
```
NearMatchResolutionV2 Response – Create a New ID

This sample demonstrates a SOAP response to create the new ID request above.

```xml
<soapenv:Envelope
    xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
    xmlns:xsd="http://www.w3.org/2001/XMLSchema"
    xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns1:assignIdResponse
        xmlns:ns1="http://ws.escholar.com"
        soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <assignIdReturn href="#id0"/>
    </ns1:assignIdResponse>
  </soapenv:Body>
</soapenv:Envelope>
```

NearMatchResolutionV3 Response – Create a New ID

This sample demonstrates a SOAP response to create the new ID request above.

```xml
<soapenv:Envelope
    xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
    xmlns:xsd="http://www.w3.org/2001/XMLSchema"
    xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <ns1:assignIdResponse
        xmlns:ns1="http://ws.escholar.com"
        soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <assignIdReturn href="#id0"/>
    </ns1:assignIdResponse>
  </soapenv:Body>
</soapenv:Envelope>
```
NearMatchResolutionV2 Request – Assign ID

This sample demonstrates the SOAP request for the NearMatchResolutionV2 service for a submission ID that does not have pending near matches:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
  <soapenv:Body>
    <ns0:assignId xmlns:ns0="http://ws.escholar.com"
                  soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <tranSerialNumber xsi:type="xsd:string">1163</tranSerialNumber>
      <stateStudentId xsi:type="xsd:string"/>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:assignId>
  </soapenv:Body>
</soapenv:Envelope>
```

NearMatchResolutionV3 Request – Assign ID

This sample demonstrates the SOAP request for the NearMatchResolutionV3 service for a submission ID that does not have pending near matches:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
  <soapenv:Body>
    <ns0:assignId xmlns:ns0="http://ws.escholar.com"
                  soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <tranSerialNumber xsi:type="xsd:string">1163</tranSerialNumber>
      <statePersonId xsi:type="xsd:string"/>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:assignId>
  </soapenv:Body>
</soapenv:Envelope>
```

NearMatchResolutionV2 Response – Assign ID with Error

This sample demonstrates the SOAP response for the above no pending matches request.

```xml
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
  <soapenv:Body>
    <ns1:assignIdResponse xmlns:ns1="http://ws.escholar.com"
                          soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <assignIdReturn href="#id0"/>
    </ns1:assignIdResponse>
    <multiRef xmlns:ns2="http://www.escholar.com"
              xmlns:soapenc="http://schemas.xmlsoap.org/soap/encoding/" id="id0" soapenc:root="0"
              soapenc:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <ns2:NearMatchResolutionResult>
        <stateStudentId xsi:nil="true" xsi:type="xsd:string"/>
        <status xsi:type="xsd:string">FAILED_STAGE_RECORD_NOT_PENDING_NEAR_MATCH</status>
      </ns2:NearMatchResolutionResult>
    </multiRef>
  </soapenv:Body>
</soapenv:Envelope>
```
NearMatchResolutionV3 Response – Assign ID with Error

This sample demonstrates the SOAP response for the above no pending matches request.

```xml
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
    <soapenv:Body>
        <ns1:assignIdResponse xmlns:ns1="http://ws.escholar.com"
            soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
            <assignIdReturn href="#id0"/>
        </ns1:assignIdResponse>
        <multiRef xmlns:ns2="http://www.escholar.com"
            xmlns:soapenc="http://schemas.xmlsoap.org/soap/encoding/" id="id0" soapenc:root="0"
            soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/"
            xsi:type="ns2:NearMatchResolutionResult">
            <statePersonId xsi:nil="true" xsi:type="xsd:string"/>
            <status xsi:type="xsd:string">FAILED_STAGE_RECORD_NOT_PENDING_NEAR_MAT</status>
        </multiRef>
    </soapenv:Body>
</soapenv:Envelope>
```
NearMatchResolutionV2 Request – Cancel

This sample demonstrates a SOAP request to cancel a near match using the submission ID.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/
  <soapenv:Body>
    <ns0:cancel xmlns:ns0="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <tranSerialNumber xsi:type="xsd:string">1163</tranSerialNumber>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:cancel>
  </soapenv:Body>
</soapenv:Envelope>
```

NearMatchResolutionV3 Request – Cancel

This sample demonstrates a SOAP request to cancel a near match using the submission ID.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/
  <soapenv:Body>
    <ns0:cancel xmlns:ns0="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <tranSerialNumber xsi:type="xsd:string">1163</tranSerialNumber>
      <userId xsi:type="xsd:string">****</userId>
      <password xsi:type="xsd:string">****</password>
    </ns0:cancel>
  </soapenv:Body>
</soapenv:Envelope>
```

NearMatchResolutionV2 Response – Cancel

This sample demonstrates the SOAP response to a NearMatchResolutionV2 cancel request using the information from the “NearMatchResolutionV2 Request – Cancel” from above.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/
  <soapenv:Body>
    <ns1:cancelResponse xmlns:ns1="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <cancelReturn href="#id0"/>
    </ns1:cancelResponse>
    <multiRef xmlns:ns2="http://www.escholar.com"
      xmlns:soapenc="http://schemas.xmlsoap.org/soap/encoding/" id="id0"
      soapenc:root="0" soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <stateStudentId xsi:nil="true" xsi:type="xsd:string"/>
      <status xsi:type="xsd:string">SUCCESS</status>
    </multiRef>
  </soapenv:Body>
</soapenv:Envelope>
```
NearMatchResolutionV3 Response – Cancel

This sample demonstrates the SOAP response to a NearMatchResolutionV2 cancel request using the information from the “NearMatchResolutionV2 Request – Cancel” from above.

```xml
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
  <soapenv:Body>
    <ns1:cancelResponse xmlns:ns1="http://ws.escholar.com"
      soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <cancelReturn href="#id0"/>
    </ns1:cancelResponse>
  </soapenv:Body>
</soapenv:Envelope>
```
Error Response Samples – Invalid Username/Password

```xml
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
